Project: Mobile app
User Stories

US #1: "As an unregistered user, I want to access the app and view doctor's appointments."
Acceptance Criteria: An unregistered user can access the app and search doctor's schedule. To achieve this, the user has to select the following fields in this order: province, city, medic specialty, institution and finally the doctor, then the app shows the doctor schedule. An unregistered user can not book an appointment.

US #2: "As an unregistered user, I want to create a new user account to book an appointment."
Acceptance Criteria: An unregistered user can access the app and create a new user account. Step 1: The new user has to input the following fields: first name, last name, email, password.
Step 2: The new user has to input the following fields: birthdate, phone number, sex, identification number, social security type, social security number.
All these fields are mandatory.
Step 3: The user selects one specific available time of the doctor's schedule.

Once the app valids all data, the user can book a doctor's appointment, and the system send an email to the user with information detail about the appointment.

US #3: "As an unregistered user, I want to create a new user account to book an appointment using a social network account."
Acceptance Criteria: An unregistered user can access the app and create a new user account using a social network account, like Facebook, Twitter or Google+.

Once the app valid all data, the user can book a doctor appointment.

US #4: "As a user, I want to edit my personal information."
Acceptance Criteria: A user can view and edits personal information anytime. To confirm this operation the user has to input the password.

US #5: "As a user, I want to access the app without input my username and password always."
Acceptance Criteria: The app persists the user account information and login the user automatically each time the user access the app.

US #6: "As a user, I want to cancel an appointment"
Acceptance Criteria: A user can cancel an appointment anytime. When the user cancels the appointment the system sends and email to the user.

US #7: "As a user, I want to receive alarm notifications about my appointments"
Acceptance Criteria: A user receives two alarms notification of their appointments automatically. The first alarm is received one day before the meeting and the other, one hour before. The notification allowed the user cancel the appointment.

US #8: "As a user, I want to set my favorites doctors"
Acceptance Criteria: A user can set its favorites doctors when books an appointment.
Then the user can access to a list of its favorites doctors.

US #9: "As a user, I want to book an appointment quickly"
Acceptance Criteria: A user can access to its favorites doctors list and select one to
book an appointment. This functionality allow the user jump previous required steps.

US #10: "As a user, I want to check information by my favorite list of doctors"
Acceptance Criteria: A user can access to its favorites doctors list and view basic
information about medic specialty, institution, address and next appointment. Also, this
panel allowed the user to cancel the appointment.

US #11: "As a user, I want to check my appointments in my cell phone calendar"
Acceptance Criteria: A user can access to its cell phone calendar and view its already
registered appointment.
